Education

B.Tech Artificial Intelligence and Data Science

November 2022 - May 2026

St. Joseph's Institute of Technology
CGPA - 8.36 (upto 7th Sem)

Project

Medical Chatbot Assistant

Developed a Flask web app leveraging Google Gemini AI for medical condition prediction, symptom analysis, and hospital recommendations. Implemented AI-driven diagnosis with PDF generation for treatment suggestions and a location-based hospital recommendation system. Integrated feedback loops to improve AI accuracy while ensuring secure data handling and user privacy.

AI-Powered Accident Assistance System

Developed a Flask-based AI system that detects accidents, extracts license plate numbers using OCR (PaddleOCR + OpenCV), and predicts injury severity with a ResNet model. Automated emergency response using Twilio API to notify authorities and nearby hospitals.

NeuroHire: AI-Powered Recruitment Platform

Developed a full-stack, AI-driven recruitment platform to automate candidate screening and streamline the hiring process. Implemented an intelligent recommendation engine that parses resumes, ranks candidates based on job relevance, and displays results on a recruiter dashboard. Key features include job posting management, smart candidate shortlisting, and analytics for hiring metrics like time-to-hire and top skills.

Nyayavani: Offline Voice Legal Guardian

Developed an AI-powered offline legal assistant that provides multilingual voice/text-based legal guidance for rural and low-literacy users. Built legal situation detection and risk prediction models using PyTorch and BERT/IndicBERT. Integrated Neo4j Knowledge Graph for context-aware legal reasoning and step-by-step action guidance. Implemented offline Speech-to-Text and Text-to-Speech using Whisper/Vosk and Coqui TTS with FastAPI, React.js, and PostgreSQL.

Experience

AI Trainee Developer | Himitsu Labs

January 2026 - Present

Working on AI-based application development with contributions in both backend and frontend systems. Developed and integrated backend APIs, AI modules, and workflow logic for intelligent applications. Currently involved in AI feature development, model integration, and frontend enhancement using modern web technologies. Collaborating on real-time projects focused on scalable architecture, automation, and user-centric AI solutions.

Machine Learning Trainee | Altrosyn Technologies Pvt Ltd

May 2025 - December 2025

Project: **Multimodal Generative AI Meme Creator** Spearheaded the development of a generative AI application that converts user text or voice commands into memes. Focused on training, fine-tuning, and integrating the core AI models for multimodal content generation.

AI Developer | Read Automation

February 2025 - May 2025

NeuroHire: AI-Powered Recruitment Platform Developed an intelligent recruitment platform to automate end-to-end hiring workflows and improve recruiter efficiency. Integrated AI-driven resume parsing, candidate shortlisting, a recruiter dashboard for job/application tracking, and smart interview scheduling with calendar integration

Skills

- **Programming skills:** C, Python, SQL, HTML, CSS, React, Next.js, Go, Rust
- **Machine Learning and AI:** Deep Learning, Generative AI, Model Training, Fine-Tuning, Feature Engineering.
- **Libraires and Framework:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, ZOD
- **Tools and Platforms:** ChatGPT, Prompt Engineering, KNIME Analytics Platform, Docker, Git and Github, Stitch, Cursor, Windsurf, Antigravity
- **Backend, Authentication and Authorization:** Keycloak, OpenFGA, REST APIs, Flask, FastAPI
- **Data Skills:** Data Visualization, Data Cleaning and ETL, SQL Queries and Database Handling
- **Database:** MongoDB, PostgreSQL, MySQL, MariaDB

Certifications

- **Prompt Engineering Essentials** completed in Simplilearn
- **Data Science in KNIME Analytics Platform** Basic Proficiency in KNIME Analytics Platform
- **Data Science for Engineers** Completed in National Programme on Technology Enhanced Learning
- **Statistics 101** Completed in International Business Machines
- **NPTEL Certification** Elite certification in Data Science

Extra curricular

Finalist- AI Innovate Hackathon (Thiran 2025)

Selected as a finalist in the prestigious AI Innovate Hackathon, conducted by Sri Eshwar College of Engineering, Coimbatore.

Finalist at Project Expo 2k25 organized by IEEE Education Society and IEEE Photonics Society, St. Xavier's Catholic College of Engineering

Showcased an application-oriented engineering project selected among top entries across multiple disciplines.

Secure Third Place in Blaze a Trail 2.0 at St. Joseph's Institute Of Technology

Secured 3rd place in Blaze a Trail 2.0 competition for innovative problem-solving and was selected for an internship at Read Automation, where I gained hands-on experience in AI-driven automation projects, enhancing practical skills in developing intelligent systems and streamlining workflows

Publication

Deep-Learning-Enabled-Smart-Surveillance-System-for-Accident-Severity-Classification-and-Emergency

Published a research paper titled "Deep Learning Enabled Smart Surveillance System for Accident Severity Classification and Emergency Response Optimization" in IEEE. The work focuses on using deep learning techniques for accident severity detection and intelligent emergency response assistance through smart surveillance systems.

FARMMIND: An AI Assistant with Voice and Image Capabilities for Secure and Engaging Crop Disease Identification

Published a research paper titled "FARMMIND: An AI Assistant with Voice and Image Capabilities for Secure and Engaging Crop Disease Identification" in IEEE. The research focuses on AI-driven crop disease detection using image analysis and voice-based interaction to support smart and accessible agricultural assistance systems.
